

Below is the list of changes that have been made to TSG STANDARD 6 and the TSG-6 Approved Equipment List (AEL), (Version date: May 2026).

Added: During the May NTSWG meeting the working group (WG) members recommended unanimous approval for the DTD-WXDESK-01-L1, 100MB FO Class A (TEMPEST), TSG-A-03-2026, and DTD-WXDESK-02-L1, 1GB FO Class A (TEMPEST) Appliances, TSG-A-04-2026. See the first two (2) appliances on the list.

Change(s): Be advised vendor CIS Secure Computing has advised the NTSWG that their CIS modified Poly CCX500 has recently reached *End-of-Sale* (EOS), effective date 04/24, and as a result the Chair has added **NLA (*3)** to the back page (AEL Legend / Key) of the list and all variants for the CCX500 have been altered to reflect this change.

- The CCX600 and CCX 500 are similar with the following variation the CCX500 has a 5" screen, while the CCX600 has a 7" screen.
- The CCX600 variants are still being produced and are available through CIS.

All of the CCX500 EOS variants affected on TSG-6 Approved Equipment List are provided below:

- CIS DTD-CCX500-01D4A-SD-A
- CIS DTD-CCX500-01D4A-SD

(T) TEMPEST Endpoint(s)

NLA - This endpoint is no longer available (NLA) from the vendor. The vendor has discontinued the manufacturing of this product due to lack of demand, end of life (EoL) or end of sale (EoS).

(*1) - The WXRPLUS is no longer available (NLA) from the vendor, as manufacturing was discontinued by CISCO. This CISCO appliance will be replaced by the EQ. A submittal package for testing at the Interagency Telephony Lab (ITL) will be required.

(*2) - The DX-80 is no longer available (NLA) from the vendor, as manufacturing was discontinued by CISCO. This CISCO appliance has been replaced by the WebEx Desk.

(*3) - The CCX-500 series endpoint is no longer available (NLA) from the vendor, as manufacturing was discontinued by POLY.

Administrative modification and/or change to the description/specifications of an endpoint, appliance or device

Class A vs Class B - The difference between Class A and Class B endpoint

Class A endpoint is not dependent upon any other equipment for security.

Class B endpoint must be directly connected to a network switching device collocated within the same sensitive area as the endpoint.

NC - There is no class associated with this device because it is an analog or a digital endpoint, or it is an isolation device, a disconnect device, or a countermeasures device.

MSRP - Manufacturer's Suggested Retail Price, which is the cost that the vendor will charge after all modifications are completed.

National Pandemic Impact Statement - Due to protracted deferment caused by COVID-19 Pandemic concerns the NTSWG was unable to validate the test results previously provided by the Interagency Telephony Laboratory (ITL) within the working group. While this delayed the resumption of ITL testing and significantly decreased interaction between the vendors, ITL staff, and government sponsors throughout the community, we wanted to ensure we took appropriate steps to minimize any health concerns while ensuring the continued effectiveness and productivity of the NTSWG remain our utmost priority. In accordance with (IAW) NTSWG Memorandum (NTSWG-001-2020), dated, 14 December 2020, SUBJECT: NTSWG Approval Memorandum for Resumption of Testing by the Interagency Telephony Laboratory (ITL). The ITL was approved to commence contracting and coordination with vendors and resume full-testing operations on endpoints and peripherals.
