Position Information

This is an opportunity for:

- An internal candidate to fill a GS-15 cadre position.
- A Federal Government employee to serve on a two-year reimbursable detail assignment in the ODNI. The detail assignment may be extended an additional year if all parties agree.

Who May Apply

Current GS employees at the same grade or one grade lower than the advertised position grade may apply.

Former members of the Peace Corps may be considered for ODNI employment only if five full years have elapsed since separation from the Peace Corps.

- For a cadre assignment:
 - Current ODNI permanent cadre.
- For a detailee assignment:

- Current Federal Government employees. (Current GS employees at the same grade or one grade lower than the advertised position grade may apply.)

Salary Determination

- The ODNI uses a rank-in-person system in which rank is attached to the individual. A selected ODNI candidate or other Federal Government candidate will be assigned to the position at the employee's current GS grade and salary.
- A current Federal Government employee, selected for a detail, will be assigned to the position at his or her current grade and salary.

Component Mission

The National Counterterrorism Center (NCTC) leads our nation's effort to combat terrorism at home and abroad by analyzing the threat, sharing that information with our partners, and integrating all instruments of national power to ensure unity of effort. The Center serves as the primary organization in the United States Government (USG) for analyzing and integrating all intelligence possessed or acquired by the USG pertaining to terrorism and counterterrorism, and its Director serves as the Counterterrorism Mission Manager. NCTC also serves as the central and shared knowledge bank on known and suspected terrorists and international terrorist groups, as well as their goals, strategies, capabilities, and networks of contacts and support. In addition, NCTC conducts strategic operational planning for counterterrorism activities, coordinating and integrating the efforts of departments and agencies across the Federal Government.

Major Duties and Responsibilities (MDRs)

- Lead and manage complex computer engineering projects or programs that may have ill-defined requirements, ambiguity, parallel tasks, multiple dependencies, high risks, and multiple interfaces; manage the design, construction, testing, and implementation of technical and functional specifications; provide technical oversight and initiate, plan, implement, and coordinate activities throughout the life of the project.
- Design engineering solutions and alternative design options to meet customer requirements and provide guidance to junior engineers in the design and development of engineering solutions.
- Deconflict complex functional requirements into underlying technical requirements and recommend "best fit" allocation of those requirements. Lead the development of technical and systems requirements.
- Conduct technical research on such topics as operational guidelines, best practices, and international standards, and develop procedures for installation of hardware, software, or network components.

- Analyze, define, and document requirements for data, workflows, logical processes, hardware and operating system environments, network connectivity, systems interfaces, internal and external checks and controls, and outputs.
- Oversee the design, evaluation, selection, implementation, and support of development and production support tools and platforms.
- Oversee the effective integration and interoperability of disparate capabilities developed by separate service providers.
- Lead the development of interoperability test plans, building upon the component test plans developed by the service providers; coordinate the testing of new capabilities with other elements to ensure that all equities are covered in the test process; serve as the Independent Validation and Verification test director, conducting the technical functionality testing and coordinating the activities of other elements as they conduct the Analysis and Accreditation testing and the user functionality test.

Mandatory and Educational Requirements

- Expert knowledge of one or more computer disciplines/specialties (hardware, software, networks); broad knowledge of other related disciplines.
- Expert knowledge of design, development, and interconnectivity in problem analysis, structured analysis and design, and or programming techniques.
- Expert ability to design and document system specifications and produce prototypes to demonstrate design.

Desired Requirements

- **Experience** One year of specialized experience at the next lower GS-grade (or equivalent). IT related experience may be demonstrated by paid or unpaid experience and/or completion of specific, intensive training (for example, IT Certification). IT-related experience demonstrating each of the four competencies (Attention to Detail, Customer Service, Oral Communication, and Problem Solving).
- **Education** Degree in computer science, engineering, information science, information systems management, mathematics, operations research, statistics, or technology management or degree that provided a minimum 24 semester hours in one or more of the fields identified above and required the development or adaptation of applications, systems or networks.

Key Requirements and How To Apply
