Component Mission

The Office of the Director of National Intelligence (ODNI) Deputy Director of Mission Integration (MI) serves as the Director of National Intelligence's (DNI) senior leader for intelligence integration across the IC enterprise. MI is responsible for ensuring customer outcomes by leading advances in collection and analysis that ensure the quality, timeliness, and utility of insights for the nation's decision-makers. Additionally, MI is responsible for increasing expertise and improving tradecraft at all levels through specialization, integration, and collaboration. MI is responsible for the strategic vision, direction, and planning to deliver a more integrated IC reflecting the collective wisdom of our collection and analytic components to advance, in support of the National Intelligence Managers, the Unifying Intelligence Strategies (UIS).

The National Intelligence Council (NIC) consists of the most senior intelligence analysts supporting the Director of National Intelligence (DNI) in carrying out responsibilities as the head of the Intelligence Community (IC) and as the principal adviser to the President for intelligence matters related to national security. The NIC produces a variety of all-source, IC coordinated intelligence reports, including its flagship product, the National Intelligence Estimate, which represents the Intelligence Community's most authoritative statement on a key national security issue.

Major Duties and Responsibilities (MDRs)

Lead the IC's production and coordination of strategic analysis, to include the preparation of National Intelligence Estimates, Intelligence Community Assessments, and other NIC products, on issues of importance to United States interests in global science and technology with particular focus on emerging technologies; make effective use of IC resources in analysis of global science and technology issues.

Collaborate with the science and technology intelligence leadership across the IC and other S&T Community entities (e.g. ODNI/Acquisition and Technology) to promote the science and technology intelligence strategy.

Develop and sustain a professional network with IC analysts, analytic managers, and collection managers on emerging technologies, foreign technology acquisition, and community management and outreach issues.

Brief senior IC members, policymakers, military decision makers, members of Congress, and other major stakeholders as necessary on global science and technology issues.

Review and analyze research and production plans on emerging technologies, technology acquisition, and community management and outreach issues of the Community's analytic components, identify redundancies and gaps, direct strategies to mitigate these gaps, and advise the NIM and NIO on shortfalls in analytic capabilities across the IC.

Establish and foster liaison relationships with academia, the business community, and other non-government subject matter experts to ensure the IC has a comprehensive understanding of emerging technologies.

Build and leverage diverse collaborative networks within the ODNI and across the IC.

Develop and continually expand personal knowledge in area of expertise

Mandatory Requirements:

Thorough knowledge of emerging technologies, technology acquisitions, and community management and outreach issues, the related IC analytic community and collection issues sufficient to oversee the IC's analytic production and identify collection requirements and gaps.

Excellent interpersonal, organizational, and management skills to conceptualize and effectively oversee analytic projects with limited supervision, ability to work with and represent the Community when analytic views differ among agencies, and ability to work effectively independently and in a team or collaborative environment.

Excellent communications skills, including ability to communicate effectively with people at all levels of leadership on science and technology issues, ability to give effective oral presentations, and to otherwise represent the NIC in interagency meetings.

Thorough critical thinking skills and reasoning skills and the ability to prepare finished intelligence assessments and other written products with emphasis on clear organization, and concise, logical presentation.

Flexibility and ability to remain open-minded and change opinions on the basis of new information and requirements; ability to support group decisions and solicit opinions from coworkers.

Ability to lead and promote the development and use of a broad range of methodological tools and approaches to research, analyze, and present data (modeling, link analysis, or software).

Creative problem-solving skills and initiative in carrying out mission responsibilities.

Desired Requirements:

Degree in Science, Technology, Engineering, or Math or comparable work experience, particularly in the biotechnology field.

Excellent briefing skills and desirable experience engaging with the NSC/OSTP

Experience engaging with foreign liaison and outreach with industry or academia.
